Manage Queue

1. Manage

2. Results

Change how the system will prioritize processing your batch(es) by changing the priority queue and/or position in the queue.

Choose Queue

- ☒ Keep current
- ☐ High
- ☐ Normal
- ☐ Low
- ☐ Remove from queue and reset to *Loaded*

Three queues prioritize how quickly content will move through the system. Choose a queue for your batch(es) or select *Keep Current* to leave your batch(es) in their existing queue.

Choose Position in Queue

- ☒ **Keep current**
- ☐ **Move to front**
- ☐ **Move to back**

Within each priority queue, the system works on batches in first in, first out order by default. Batches at the front of the *High* priority queue will be processed first; batches at the back of the *Low* priority queue will be processed last. You can override the default by moving your batch(es) to the front or back of the line.

Trim Path

1. Edit > 2. Results

Remove part of the path name from all files in your batch.

Path Names

C:/tmp/user/motd/

C:/tmp/user/motd/alpha
C:/tmp/user/motd/a/n/c
C:/tmp/user/motd/times
C:/tmp/user/motd/dashing/dodger/volume/one
C:/tmp/user/motd/another/example
C:/tmp/user/thumbs.gif
C:/tmp/user/motd/a/a/b

Select the new path.
